

**INTENDED USES:**

A fast drying latex primer for use on non-porous interior surfaces such as plastic, previously painted wood or metal surfaces, vinyl wallcoverings, glass and various "factory finishes"\* which often present recoating problems.

**PRODUCT DESCRIPTION:**

A high quality acrylic vehicle combined with suitable pigments.

**TECHNICAL INFORMATION:**

|                                  |   |
|----------------------------------|---|
| <b>Finish:</b>                   | Flat  |
| <b>Standard Colours:</b>         | White   |
| <b>Tint Range:</b>               | Light Millennium colours  |
| <b>Recommended # of coats:</b>   | 1-2 at recommended coverage                                       |
| <b>Theoretical Coverage:</b>     | 27-36 m <sup>2</sup> /3.7L (290-380 ft <sup>2</sup> /3.7L)        |
| <b>Typical Volume Solids:</b>    | 36%   |
| <b>Typical Specific Gravity:</b> | 1.4   |
| <b>Flash point:</b>              | Not Applicable  |
| <b>Application Thinner:</b>      | Not normally required. Up to 10% water may be added if necessary. |
| <b>Clean-up Thinner:</b>         | Water   |

**SURFACE PREPARATION:**

Surfaces must be clean, dry and free from dust, grease, mildew and wax. Remove any loose and peeling paint and repair with patching compound. Surface repairs should be spot primed.

**APPLICATION:**

Brush, Roller, Air Spray or Airless Spray

Airless Tips: .013" - .017"

Dry times at 21°C / 70°F and 40%-60% R.H.:

|              |                  |
|--------------|------------------|
| To Touch:    | 15 to 30 minutes |
| To Handle:   | 2 hours          |
| To Overcoat: | 3 hours minimum  |

Allow 24 hrs. if topcoating with an alkyd or industrial finish.

**PRODUCT HAZARDS SAFETY INFORMATION:**

See Material Safety Data Sheet for complete Health and Safety information.

**ADDITIONAL DATA:**

For optimum adhesion and application performance, ensure that the temperature and relative humidity are between 15-25°C and 40-60% respectively, at the time of application and for four hours afterward. Sanding of glossy surfaces will provide optimum adhesion and application properties. \*As some factory finishes contain wax or silicone surface treatments, a test area should be carried out to ensure that adhesion will be satisfactory. A minimum of 7 days will be required before testing adhesion since the adhesive properties progressively improve for up to 28 days. Complies with the requirements of MPI #17 & #134.
